

**HomeEarth**  
**Wendy & DB, 2017**  
13 tracks

On their newest album “HomeEarth”, Wendy & DB, a dynamic duo/band from Chicago, address the important messages for children and all people that we need to work together, be happy, feel our feelings, and take care of our wonderful world and ALL the folks that live in it. Children will be engaged with melodic, interactive and contagious songs that even adults will like! Thirteen tracks are filled with bugs and bees, animals and trees, and include “We Bop,” a fun new dance tune and “Girl Superhero”, one of several puppet characters who has begun making exciting appearances at Wendy & DB concerts! Guest artists include Grammy-award winning harmonica star Howard Levy; celebrated guitarist Verlan Thompson; and the Funn Band, comprised of pianist Dean Rolando, bassist Geoffrey Lowe, and Dennis Calito on percussion, who appear regularly with Wendy & DB.

Wendy & DB are committed to giving back by raising money and awareness for organizations such as VH1 Save the Music, Xerces Society and the Jane Goodall Institute. A portion of proceeds from this CD and merchandise will support one or more of these non-profits.
